NAVEEN KARTHIK S

5/279 EB Colony, Alampatti, Kovilpatti | +91 8270369856 | naveenkarthick130@gmail.com

PROFESSIONAL SUMMARY

Motivated Artificial Intelligence and Data Science undergraduate skilled in Python, Java, HTML, and CSS, with hands-on experience in Generative AI, Machine Learning, and Computer Vision. Experienced in developing AI-driven applications, workflow automation solutions, and real-time intelligent systems through academic projects and internship experience. Passionate about problem-solving, continuous learning, and building innovative technology solutions that create real-world impact.

SKILLS

Programming Language: Python
Web Technologies: HTML, CSS
Frameworks & Libraries: TensorFlow, Keras, OpenCV
Tools & Platforms: Git & GitHub, VS Code, UiPath (RPA)

EXPERIENCE

Skill Forge Innovation — Gen AI Intern 09 Aug 2024 – 27 Aug 2024

- Developed innovative prototypes using Generative AI, automating workflows to reduce manual effort and improve efficiency while enhancing decision-making with AI-driven problem-solving approaches.
- Explored the latest Gen AI advancements and collaborated on AI-based solutions that improved user experience and delivered measurable value to projects.

EDUCATION

Degree / Program	Institution	Year	Score
B.Tech, Artificial Intelligence & Data Science	P.S.R.R College of Engineering ,Sivakasi	2022 – 2026	7.6 CGPA
Higher Secondary (12th)	Everest Mariyappa Nadar Hr. Sec. School, Kovilpatti	2021 – 2022	60%
Secondary (10th)	St. Paul's Matriculation Hr. Sec. School, Kovilpatti	2019 – 2020	65%

CERTIFICATIONS

- Generative AI Certification — Skill Forge Innovation: Gained hands-on expertise in advanced AI tools and frameworks to solve real-world problems; strengthened analytical, problem-solving, and innovation skills with a focus on automation and future-ready solutions.
- UiPath Associate Developer Certification: Gained knowledge of Robotic Process Automation (RPA) using UiPath, including workflow automation, process design, debugging, and bot deployment to improve productivity and efficiency.

PROJECTS

Air Traffic Flow Management (ATFM)

- Optimized airspace usage and streamlined flight operations to reduce congestion and delays, enhancing efficiency, safety, and coordination for reliable airspace management.

Real-Time Drone Detection and Threat Alert System for Air Force Security

- Developed an AI-powered drone detection system for monitoring restricted airspace and enhancing security operations.
- Implemented drone detection using OpenCV, TensorFlow, Keras, and Faster R-CNN deep learning models for real-time object detection and classification.
